# One-year Planning grid for entering the job market

| JOB MARKET GOALS | | |
|---|---|---|
| Student choose the position that fits their strengths and interest | /15 | Back-end |
| **THEIR FEAR** | | |
| Student mention their fear specifically | /15 | Scared and  Worried |
| **INTERNAL SOLUTION** | | |
| They show the ways to overcome their fear individually | /15 | First, I have to prepare everything as well as. Such as knowledge, ability. It very important for me because when I have a knowledge or ability, it can make me confident more than before and reduce my scared with someone. I have to stay focused. I am friendly. Positive thinking (they can do. So, I also can do). Motivate myself that everything will be better. |
| **EXTERNAL SOLUTION** | | |
| They show the ways to overcome their fear with external solutions(PNC) | /15 | I must build a network with everyone especially who we work with and seniors. I have to apply helpful skill and 5 PNC's values in my workplace. |
| **TIMELINE** | | |
| Divide the timeline (day, month) into one year | /20 | I divide 12 months in one-year start from this month (22, January 2024) until (1, January 2025). It is mean in one month I have one plan. |
| Detailing each month what are they planning | /20 | I write details below. |
| **TOTAL** | **100** | |

| | |
|---|---|
| January | - Research about IT career paths and specializations within the field.<br><br>- Update my resume to highlight my technical skills, projects, and relevant coursework.<br><br>- Begin networking with professionals in the IT industry, such as teacher, seniors, external and internal speakers and other people who can share me related to IT skill especially Back-end developer.<br><br>- learn much about teachers' teaching from PNC. Both hard skills and soft skills. |
| February | - Develop my online professional presence by creating a LinkedIn profile and show casing my technical projects on platforms like GitHub, website .etc.<br><br>- Attend IT career fairs, tech meetups, or networking events and other workshop. |
| March | - Practice technical interview questions. Both English and Khmer.<br><br>- Try to understand of coding challenges to be stronger and solve it in the best way. |
| April | - Follow up on job applications and continue networking with IT professionals.<br><br>- Prepare a list of references that can speak to my technical abilities. |
| May | - Consider seeking guidance from IT career coaches or mentors for further career advice.<br><br>- Try to understand about companies needed more than before. |
| June | - Focus on fundamental programming languages, database management, networking concepts, or any other core skills required.<br><br>- Participate in practical projects or internships to gain hands-on experience. |
| July | - Prepare professional CV to be ready for a job interview. That I can get the CV from internet, trainer at PNC so on.<br><br>- Prepare as well as and show my ability to teacher, HR by any way to easy choose the company match with my ability.  What can I do for their company?<br><br>- Practice question and answer for interview every day. Make sure I have confident and I can pass an interviewing. |
| August | It is a month that I start internship at the company. So, I need<br><br>- I make a confident and overcome and get all<br><br>- I am going to try to do my best for internship at the company<br><br>- I'm going to learn something at the company especially something is new. Such as new languages of technical skill so on.<br><br>- I try to build networking with people at workplace |

| | |
|---|---|
| September | It is that time I am interning at the company |
| | - Stay fuscous on project make sure I can do it. |
| | - list down something new and apply it in my real life and other place |
| | - sharing what I have learn to juniors and other people. |
| October | It is that time I am interning at the company |
| | - Work hard and continues good communicate |
| | - Notice about the company. All related to project, communicate, Manger .etc. |
| November | - Summarize main point that I have noted from the company |
| | - Start to think about what did I get from this company? What have I learnt? Can apply it in my real life then change my life is better. |
| December | - ask myself that therefore can I work here after completed internship belong four months |
| | - If I can work here so, I will stay fuscous and do my best and make something better more. If I cannot, I will change the company then I will find the company that match with my interest and I can work. |
